UVair Fuel Pricing and Availability Now Available Via FlightAware

Houston (Sept. 25, 2007) – Operators can now access information about UVair[®], including fuel pricing and domestic location acceptance, when using FlightAware’s flight tracking service.

FlightAware (flightaware.com) is the first company to offer free flight tracking services for both private and commercial air traffic in the United States. FlightAware provides several ways to track business aviation flights on its easy-to-use Flight Tracker tool. Users can track flights by entering either a flight or tail number or the airport code to which the flight is operating.

“We are excited that UVair[®] fuel quote information and domestic availability is now a simple and automatic component of FlightAware’s airport information web pages,” said Greg Cox, UVair[®] Vice President. “When viewing airport information, terminal procedures, or FBO availability at any domestic airport that accepts the UVair[®] Fueling Card, FlightAware will automatically display a drop-down feature allowing users to get quotes and check availability. Or if they are not a current UVair cardholder, fast access to more information.”

“We feel that providing information from a trusted name such as UVair[®] provides a value-added benefit to users of our free flight tracking service,” said FlightAware President Daniel Baker.

###

About FlightAware

FlightAware (flightaware.com) is the most popular flight tracking company in the world. FlightAware was the first company to offer free flight tracking services for both private and commercial air traffic in the United States. FlightAware offers flight tracking, airport information, weather, and aviation data analysis services to over 1,500,000 monthly users via the free FlightAware.com web site as well as commercial services directly to aviation businesses. Founded in 2005, FlightAware is privately held and based in Houston.
